PROFILE

I am a creative, full stack web developer with a background in health sciences and pharmacy. Through my coding experience, I developed a strong adaptability to new technologies, as well as strength in refactoring code and resolving bugs. During pharmacy school, I created an educational pharmacy website/ Instagram for my classmates and decided to transition into computer science to fulfill my web development passion. I completed the full stack coding boot camp at Northwestern where I learned how to create front, back-end, and full stack web applications.

EMPLOYMENT HISTORY

Inpatient Pharmacy Intern , OhioHealth: Riverside Methodist Hospital   Columbus, OH
